

GANES VALUE GROWTH FUND

The Ganes Value Growth Fund recorded a small negative performance for April of -0.42% . The portfolio remains largely unchanged from the previous month with performance for the month enhanced by Sonic Healthcare (+10.9%), Treasury Group (+12.7%) and Australian Wealth Management (+7.1%) largely offset by falls in Cabcharge (-8.2%), Mortgage Choice (-32.8%) and Platinum Asset Management (-15.2%).

The large fall in the Mortgage Choice share price reflects an announcement by Westpac Bank that they are implementing reductions in commissions paid to mortgage brokers. This issue has been raised previously but Westpac have now 'pulled the trigger' and it remains to be seen if other lenders will follow suit, or whether Westpac has played a lone hand and will likely lose market share. The situation is far from certain in terms of the eventual outcome, but in the short term it does represent a test of the business model and company management which is obviously weighing heavily in the minds of some shareholders.

During the month we added to our position in McMillan Shakespeare at prices not seen for nearly two years and almost 40% below that of July 2007. McMillan Shakespeare, established in 1989, became a publicly listed company in March 2004 providing administration services for the provision of salary packaging and motor vehicle fleet management, mainly to employees of government departments and large employers. For the latest half-year the company reported a 20% increase in revenue to \$31.5m and a 31% increase in net profit to \$8m. In addition to being a very profitable business the company is conservatively financed with no debt and \$13m cash in the bank. Aside from buying at 13 times this year's earnings and with a 5% dividend yield, the company has achieved good growth over many years, is a market leader in its field, and the current Managing Director founded the business and remains its largest shareholder. All factors that should contribute to attractive returns for investors over the longer term.

While there were no other additions to the portfolio during the month we are increasingly seeing companies selling at prices that are much more attractive than they have been for some time, and in some cases years, and expect to take advantage of this situation.

Performance Summary	Ganes Value Growth Fund	UBS Bank Bill Index
Since Inception p.a. (18/11/05)	7.19%	n/a

GANES VALUE GROWTH FUND

The Ganes Value Growth Fund provides investors with exposure to a unique portfolio of Australian listed companies that will provide growth and income to investors over the longer-term. It is their meticulous approach to studying companies while taking into account the macro-level drivers of Australian business that make Ganes such a capable investment firm.

Ganes investment methodology comprises both quantitative and qualitative analysis commonly called fundamental analysis. This research process ensures that financial ratios and measures are used to demonstrate that the company produces superior returns, while also making experienced judgements about the underlying strength of the business and the talent of its management team.

The team at Ganes often refer to the following quote as an insight into their investment strategy:

"If you are a prudent investor or sensible businessman, will you let Mr. Market's daily communication determine your view of a \$1000 interest in the enterprise? Only in case you agree with him or want to trade with him. You may be happy to sell out to him when he quotes you a ridiculously high price, and equally happy to buy from him when his price is low. But the rest of the time you will be wiser to form your own ideas of the value of your holdings, based on full reports from the company about its operations and financial position." - (extract from *The Intelligent Investor* by legendary investor Ben Graham)

The Ganes Investment Philosophy distills down to paying a reasonable price for a growing quality business, and therefore is a process based on individual stock selection to generate superior returns. A 'typical' investment in the portfolio is a profitable, growing business with an easily understood business model that can be purchased at a price that will deliver, in the opinion of Ganes, a superior return over the medium to long term.

With an attractive investment opportunity identified, Ganes will allocate 1 to 2 percent of the fund's assets to an initial purchase, then over time build a larger stake in the business as comfort levels increase with the business and its management. Holdings will be added to, reduced, or sold entirely as changes in the underlying economics of the business, market pricing, or Ganes' assessed value of the company occurs.

ABOUT THE FUND MANAGER

Ganes Capital Management Ltd was founded in 2002 by Dr. Clive Gaunt and Mr Wayne Jones as a privately-owned boutique fund manager based in Brisbane, specialising in the management of investments in the Australian equities markets. The name 'GANES' is derived from the manager's surnames, GAunt and joNES.

Clive has a Ph.D from the Queensland University of Technology, a Masters of Financial Management from the University of Queensland and a Bachelor of Business from the Brisbane College of Advanced Education. Clive has held various academic positions including Senior Lecturer in Finance at the University of Queensland Business School. His stockmarket research has been published in national and international peer reviewed journals and, for several years, wrote a monthly column for Shares magazine.

Wayne is a CPA (Certified Practising Accountant) and has a Bachelor of Business from Queensland University of Technology. He has extensive commercial experience in accounting and finance roles in both public and private companies, as well as writing for The Intelligent Investor investment newsletter covering a range of companies and investment issues.
