

OFFICIUM SPECIAL SITUATIONS FUND

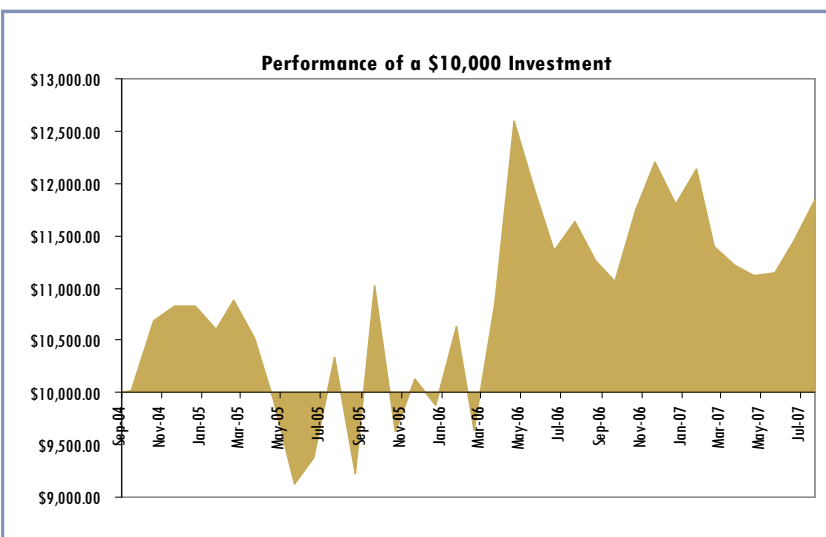

The Officium Special Situations Fund returned 3.46% for July, with one new investment added in the month, Perseverance Corporation Limited. Volatility continued in July with sharemarkets globally falling sharply towards the end of July after reaching highs earlier in the month. Gold prices were also volatile as was the Australian Dollar.

The majority of the holdings in the Officium Special Situations Fund are performing well, with the Fund reducing its exposure to LinQ Resources Fund and Equigold Limited in July as prices approached our valuations. Mariner Pipeline Income Fund is providing an income return of over 11% p.a., and whilst Allco Equity Partners Limited's share price has been volatile, the future is looking positive with a new Chief Executive Officer of Allco Group and the continued buy back of shares by the company.

One of the smaller holdings of the Fund, Daisy Holding Company Limited, the start up brewery in Brisbane, has opened for business with its first beer produced in July. They also came in under budget on their construction costs.

The newest addition, Perseverance Corporation Limited (PSV), is only a small holding at present with a weighting of under 0.50%. Perseverance Corporation is an Australian based gold producer and explorer, and owns and operates gold mines at Fosterville and Stawell in Victoria, Australia and has extensive exploration tenements covering over 7,000km² along major trends within the world-class Victorian goldfields. In early July Perseverance announced that its financial position had been adversely impacted due to production short falls, a lower gold price, and cost pressures and thus were raising \$25 million in new equity to address the financial position and support an increase in mine development at Fosterville aimed at providing greater production flexibility. Perseverance expects to be cash negative during the first four months of the 07-08 financial year.

NOTE: Due to the high concentration of RSG in this Fund, any purchase of new units in the Officium Special Situations Fund is effectively equivalent to investing circa 32% of your funds in Resolute Mining Limited (RSG) at current share prices, i.e. as at 31 July 2007, \$1.45. Please be mindful of this when considering a new investment into the Officium Special Situations Fund or purchasing additional units in the Fund.

Performance Summary	Officium Special Situations Fund	UBS Bank Bill Index

OFFICIUM SPECIAL SITUATIONS FUND

With a concentrated investment portfolio seeking to maximise medium-term gains, the Officium Special Situations Fund focuses on investing in the most attractive opportunities rather than diversifying investments across asset classes. The Special Situations Fund offers investors a unique approach to investing in the Australian share market.

The investment team uses a screening model to identify attractive investment opportunities. It then assesses the opportunity using qualitative and quantitative analysis, with an overriding value-oriented and fundamentals-based research process. This is enhanced by research visits and interviews with potential companies and projects throughout Australia. Once the research process is complete, opinions on each nominated investment opportunity are formulated and debated by the team before any decisions are made on investment levels and position limits.

Officium Capital's real difference lies in its highly developed understanding and execution of its value investing approach: Preservation of capital and principled investment decisions that minimise risk to achieve positive gains for investors over the medium to long term.

In periods of exceptionally strong equity market returns, Officium funds can, and in fact likely will, under-perform against the more traditional equity funds. In such an environment many assets become overvalued and this is when the downside risk from a more traditional investment approach is greatest. Our value investing helps preserve investor's capital, through seeking to achieve positive returns in all market conditions.

During downturns and times of negative market sentiment, the value investing approach moves into its element. Value opportunities emerge throughout the investment landscape. It is in these times that the cash typically held in reserve while the market is over-heated becomes a ready resource to invest in well-managed companies with an underlying capital value worth far more than the share price reflects.

In times of recession, value investing remains a superior investment strategy although the funds adopt key defensive characteristics in order to preserve client capital. In such an environment, it is likely that other investment and asset classes will under perform, representing large-scale value opportunities from which the largest gains are made during the next growth phase in the market. Investment and asset classes will under-perform, representing large-scale value opportunities from which the largest gains are made during the next growth phase in the market.

ABOUT THE FUND

The Officium Special Situations Fund is a unique Fund that seeks to uncover value in securities not well understood by the mainstream investment community. To take advantage of these misunderstandings, the Fund invests in a concentrated portfolio of Australian securities and financial products that are undervalued at the time of acquisition.

Managed by Officium's Chief Investment Officer, David Guy, investments made by the 'Special Sits' Fund are uncovered through a methodical and comprehensive process of analysis. The Fund invests into areas of the market overlooked or disregarded by other investors, including "fallen angels" (formerly well-regarded companies which have fallen on hard times), complicated securities, and under-researched or unfashionable securities or sectors.

The objective of the Fund is to provide positive returns over the long term (five years plus) by realising the value of a stock once it is better understood by, or back in favour with, the market. Both the concentrated and misunderstood nature of the Fund's intended investments means it is likely that the Fund will be very volatile and produce its returns independent of broader asset markets.
